XMUSIC

DIGITAL MUSIC SERVER

Xantech proudly introduces the XMUSIC Digital Music Server. This high quality digital music server is loaded with features that make it the must-have product of the year. It can hold up to 2,800 hours of music (compressed) and 250 hours of music (uncompressed) that can be accessed with ease. Browse through the music by the title of the song, album, the name of the artist, or the genre. XMUSIC provides the capability to create and store custom play lists of specific music to play songs in order or randomly shuffling songs for a fresh variety. The amazing flexibility of this unit allows different songs to play in four separate areas of the home at the same time!

XMUSIC sends feedback information to custom full color interfaces on our SmartPad LCD™ Touchpanel, so you have full single touch control capability and status information throughout the house.

FEATURES INCLUDE

- 20x ripping speed from CD tray
- Four discrete analog audio outputs for independent multi-room listening
- Transfer music to portable digital music players (e.g. Apple® iPod™)
